Subject: CITES Statement for MultiSal® Menthol, 8002-07

To Whom It May Concern,

We, at Salvona LLC d/b/a Advanced Beauty Labs, hereby certify that to the best of our knowledge and based on information provided by our raw material suppliers, the product MultiSal® Menthol, 8002-07 contains Euphorbia Cerifera (Candelilla) Wax that is fully compliant with the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) requirements, and has no known restrictions on use.

The Candelilla plant (Euphorbia antisyphilitica / Pedilanthus pavonis) utilized for this wax grows spontaneously in the wild ecosystems of the Chihuahuan Desert in Northeastern Mexico. To ensure compliance with CITES and local Mexican agrarian regulations, the material is gathered via a sustainable, wild production system where only the waxy coating on the plant stems is harvested, leaving the root system intact to allow for natural regeneration. The subsequent processing at rural sites adheres strictly to established safety protocols, and our suppliers report full compliance with all local, state, and federal labor laws.

As part of our commitment to producing safe, high-quality, and compliant personal care products, we actively work with our suppliers to ensure transparency and avoid the inclusion of materials that may be of concern to consumers and regulatory bodies.

Should you require any additional documentation or have further questions, please feel free to contact us directly.

Sincerely,

Digitally Signed
