Subject: Safety Statement for Natural HydroSal® Malodor, 8069-08

We, at Salvona LLC d/b/a Advanced Beauty Labs, hereby certify that to the best of our knowledge and based on information provided by our raw material suppliers, Natural HydroSal® Malodor, 8069-08 is formulated for adult personal care applications and is not specifically intended for use on children's skin, nor has it undergone specific clinical safety testing for the 4-12 age demographic. While the formulation is 93% of natural origin and is free from many common irritants—such as sulfates, parabens, and formaldehyde donors—we recommend that any finished product intended for pediatric use undergo independent safety assessments and dermatological testing.

As part of our commitment to producing safe, high-quality, and compliant personal care products, we actively work with our suppliers to ensure transparency and avoid the inclusion of materials that may be of concern to consumers and regulatory bodies.

Should you require any additional documentation or have further questions, please feel free to contact us directly.

Sincerely,

Digitally Signed
