Subject: Statement on Raw Material Information for MultiSal® Ceretin, 9098-06

To Whom It May Concern,

We, at Salvona LLC d/b/a Advanced Beauty Labs, hereby certify that to the best of our knowledge and based on information provided by our raw material suppliers, the vegetal-derived ingredients used in our product MultiSal® Ceretin, 9098-06 are sourced as follows:

- BUTYROSPERMUM PARKII (SHEA) BUTTER is derived from crude shea butter obtained from the nuts of the shea tree (Vitellaria paradoxa), which grows spontaneously in the natural ecosystems of Burkina Faso. Our supplier holds an EcoVadis Platinum Medal and actively promotes sustainable harvesting practices.
- GLYCERIN is derived from vegetable oils, specifically rapeseed, sunflower, and castor oil. The respective plants are sourced from the European Union, South America, and India.
- PALMITOYL TRIPEPTIDE-5 is synthesized utilizing palmitic acid derived from palm oil. The palm oil used in this supply chain is RSPO Mass Balance (MB) Certified and supplied by agroVet GmBH, Austria.
- ALOE BARBADENSIS LEAF JUICE is derived from the leaf of the aloe vera plant (Aloe barbadensis miller). It is sourced naturally and decolorized in the United States.

As part of our commitment to producing safe, high-quality, and compliant personal care products, we actively work with our suppliers to ensure transparency and avoid the inclusion of materials that may be of concern to consumers and regulatory bodies.

Should you require any additional documentation or have further questions, please feel free to contact us directly.

Sincerely,

Digitally Signed
