Subject: California Proposition 65 Compliance Statement for MultiSal® Natural Aloe Vera, 9123-02

To Whom It May Concern,

We, at Salvona LLC d/b/a Advanced Beauty Labs, hereby certify that to the best of our knowledge and based on information provided by our raw material suppliers, the product MultiSal® Natural Aloe Vera, 9123-02 is in compliance with California Proposition 65 and meets strict safety thresholds regarding anthraquinone (aloin) impurities. The Aloe barbadensis leaf ingredient utilized in this formulation is processed exclusively from whole leaf aloe vera that undergoes a rigorous decolorization process via carbon filtration to remove aloin. Consequently, this material is not classified as "Aloe Vera, non-decolorized whole leaf extract" under the California OEHHA Proposition 65 listing.

Regarding specific impurity levels for safety verification:

- Pure Ingredient Form: The aloin content complies with a threshold of <0.1 ppm at the raw material level.
- Final Product Formulation: Due to the decolorization process, the aloin level in the final MultiSal® Natural Aloe Vera product is well below standard safety limits, remaining at <0.04 ppm.

As part of our commitment to producing safe, high-quality, and compliant personal care products, we actively work with our suppliers to ensure transparency and avoid the inclusion of materials that may be of concern to consumers and regulatory bodies.

Should you require any additional documentation or have further questions, please feel free to contact us directly.

Sincerely,

Digitally Signed
